

# Supporting the PSM is Good Policy

In today's competitive global marketplace, the U.S. workforce needs expertly trained professionals who combine an advanced science, technology, engineering, mathematics and/or computer sciences education with expertise in communications, project management, ethics, and other professional skills that are in high demand. The Professional Science Master's (PSM) degree produces graduates who are prepared to meet both the scientific challenges of the 21<sup>st</sup> century and its high technology workforce needs.

## PSM program growth is dynamic and your support maintains momentum

## HOW DOES THE PSM ENHANCE U.S. COMPETITIVENESS?

- Exciting career opportunities with competitive salaries inspires students to undertake advanced STEM degrees
- Mutually beneficial partnerships between employers and universities
- Innovative research and discovery that fosters U.S. leadership on the global stage

Programs at 165 academic institutions in the U.S. and internationally in Australia, South Korea and the United Kingdom.
